Customer Journey Map

Course: User Experience Design & Human-Computer Interaction — UFRO 2026-2

Initiative 03: Assessment feedback that students actually use — **Redo**

Group 5 — one general journey in six stages (Know, Prepare, Receive, Understand, Ask, Track)

	01 Know	02 Prepare	03 Receive	04 Understand	05 Ask	06 Track
Scenario	A new week starts and she wants to know what is coming.	An assessment is two weeks away.	The result of an assessment is released.	She wants to know why the grade is what it is.	A correction looks wrong or unclear.	The semester advances; is she improving?
Expectations	See all dates in one place.	Know what will be evaluated.	See the grade and where she stands.	Know exactly where points were lost.	Ask in a clear, respectful way.	See a clear trend.
Actions	Opens the app and checks the calendar.	Opens the published rubric.	Opens the result.	Reviews criteria or incorrect questions.	Writes a message about one criterion.	Opens progress and compares.
Screens	HD-04, HD-05	HD-08	HD-04, HD-06, HD-07	HD-06, HD-07	HD-09	HD-10, HD-11
Emotional curve	Uncertain	Focused	Anxious	Reassured	Hopeful	Encouraged
Teacher actions	Schedules (HD-12, HD-13).	Publishes rubric or test (HD-13).	Reviews test, final comment (HD-14).	—	Answers, may adjust score once (HD-15).	—
Thoughts	"I do not want to miss a date."	"Now I know what to focus on."	"Please let it be good."	"So that is where I lost it."	"I hope this does not sound like a complaint."	"I can see my biggest mistake."
Pain points	Dates live in several places.	Rubric published late or not at all.	Only a number appears.	Comments are generic.	No clear channel to ask.	No context or comparison.
Opportunities	Calendar with state per day.	Rubric published in advance.	Grade with course average.	Points by criterion; correct answers.	Structured query anchored to a criterion.	Progress chart, biggest error.

Primary users: Valentina Rojas and Samon Baker. Secondary user: Martina Soto (teacher actions row). Screen IDs refer to the Figma prototype (HD-01 to HD-15).
