# Problem Brief & Value Proposition Canvas

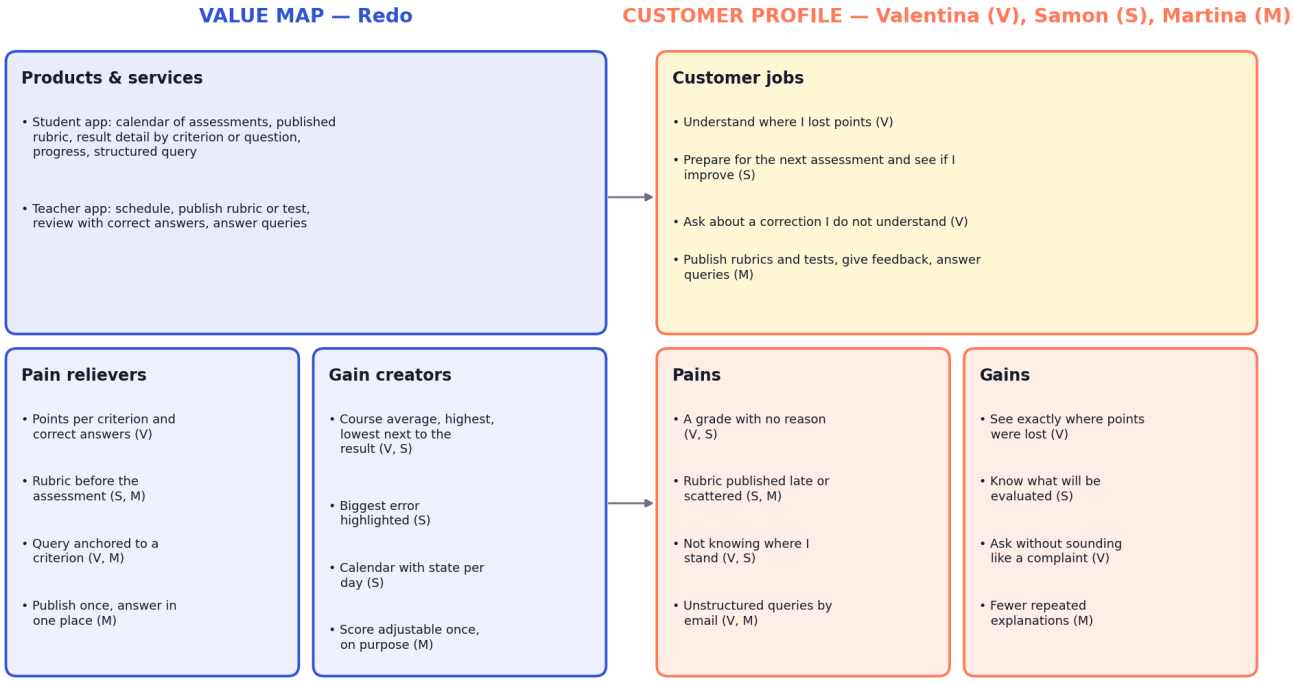

Course: User Experience Design & Human-Computer Interaction — UFRO 2026-2
Initiative 03: Assessment feedback that students actually use — **Redo**
Role: UX Analyst (Bastian Wenckhans) — Deliverable: Milestone 1, Strategy plane

## 1. Problem brief

Feedback on assessments reaches students as a grade plus comments scattered across files and emails. Rubrics arrive late, students cannot tell where they lost points or how they compare with the course, and they have no clear way to question a correction. Teachers repeat explanations and handle queries across several channels.

> *User story: as a student who received a low grade, I need to see exactly which criterion or question cost me points, and why, so that I can prepare better for the next assessment and ask my teacher about any correction I do not understand.*

## 2. Canvas

## 3. Value proposition by persona

| Persona | Customer jobs | Pains relieved | Gains created | Redo capability (screens) |
|---|---|---|---|---|
| **Valentina Rojas** primary | Understand where she lost points; ask about a correction she does not understand. | A grade with no reason; generic comments; not knowing how to ask without confrontation. | Points per criterion and correct answers; a query anchored to that criterion. | Rubric and test detail, query (HD-06, HD-07, HD-09). |
| **Samon Baker** primary | Prepare for upcoming assessments; see whether he is improving. | Learning the rubric after the assessment; no sense of where he stands. | Rubric in advance; course average, highest and lowest; biggest error. | Calendar, next assessment, progress (HD-05, HD-08, HD-10). |

| Persona | Customer jobs | Pains relieved | Gains created | Redo capability (screens) |
|---|---|---|---|---|
| **Martina Soto** secondary | Publish rubrics and tests, give useful feedback, answer queries efficiently. | Repeated questions by email; rubrics scattered; unstructured queries. | One place to schedule, publish, review and answer; score adjustable once. | Teacher agenda, publish, review, answer (HD-12 to HD-15). |

## 4. Scope note

The value proposition covers what is built in the 15 HD screens. Evidence upload, free chat, a final-grade calculator and integration with institutional systems are outside the scope of this milestone (see the scope document).
