

Feedback students can act on

Primary user · Engineering student

Personal Information

Age: 20
Field: Computer Engineering
Institution: Universidad de La Frontera
Location: Temuco, Chile
Role: Undergraduate student

Goals

- Identify the criterion behind a low grade.
- Apply a concrete corrective action.
- Compare that criterion in her next report.

Frustrations

- A low grade does not explain how to improve.
- General advice is hard to apply to technical work.
- Feedback is scattered across files and emails.

Bio

Valentina is a computer engineering student at Universidad de La Frontera. After a low grade, she struggles to translate comments into corrections. She would use the solution to identify a failed rubric criterion, follow a specific action and check whether that criterion improves in her next submission.

Personality

Persistent and analytical. She feels anxious when the expected standard is unclear.

Interests

Programming, collaborative study and visual notes.

Needs

- Feedback tied to rubric criteria.
- Specific actions with examples.
- Progress shown for each criterion.

Feedback students can act on

Primary user · Design student and intern

Personal Information

Age: 21
Field: Graphic Design
Institution: INACAP
Location: Temuco, Chile
Role: Student and design intern

Goals

• Prioritize revisions around work and study.
• Understand which design decision needs changing.
• Submit an improved version on time.

Frustrations

• Long comments do not identify the first priority.
• Feedback on different versions is hard to track.
• Limited time makes searching several sources costly.

Bio

Samon is a graphic design student at INACAP and a part-time design intern. With limited time for revisions, he needs clear priorities. He would use the solution to gather feedback by project, act on rubric-linked comments and point to the design changes that show he applied them.

Personality

Practical and visually oriented. He values clear priorities and efficient workflows.

Interests

Visual communication, illustration and creative projects.

Needs

• Feedback grouped by project version.
• Prioritized actions for each criterion.
• Evidence linked to each design change.

Group 5: Cristian Sandova · Emilia Toro · Bastian Wenckhans

MARTINA SOTO

Feedback students can act on

Secondary user · University instructor

Personal Information

Age: 29
Field: Education
Institution: Universidad Católica de Temuco
Location: Temuco, Chile
Role: University instructor

Goals

• Give feedback students can act on.
• Check whether previous comments were applied.
• Assess progress consistently across submissions.

Frustrations

• Students repeat errors despite receiving comments.
• Earlier feedback is hard to find while grading.
• Checking revisions can add to her workload.

Bio

Martina is an instructor at Universidad Católica de Temuco who evaluates staged assignments. As a secondary user, she would use the solution to connect comments to rubric criteria and corrective actions. In the next submission, she would review students' revision evidence and compare criterion results to check their progress.

Personality

Supportive and systematic. She values clear expectations and evidence of learning.

Interests

Teaching methods, formative assessment and mentoring.

Needs

• Comments linked to corrective actions.
• Evidence linked to earlier feedback.
• Comparable results for each criterion.
