Value Proposition Canvas

VALUE PROPOSITION (Solution)

Gain Creators

Features

Promotes guided self-evaluation prior to submission

Optimizes study time by focusing efforts on actual deficiencies

Closes the learning loop by showing the student their evolution

Academic Dashboard: Profile with schedule, dates, and courses

Rubrics Module: Integrated evaluation rubrics visible pre- and post-test

Progress Panel: Comparative history of performance per course

Binding Feedback: System that links a failed criterion to a direct corrective action

Pain Relievers

Transforms abstract comments into timely, actionable guidelines

Mitigates the perception of subjectivity by exposing the rubric in advance

Unifies academic management in a single digital environment

CUSTOMER SEGMENT (Student)

Gains

Transparency and objectivity in the evaluation process

Measurable evidence of progress throughout the semester

Total centralization of academic information

Absolute clarity on the required steps for improvement

Customer Jobs

Organize the academic schedule (classes and exams)

Execute precise corrective actions in subsequent submissions

Know the formal evaluation criteria in advance

Understand errors made in previous evaluations

Pains

Unawareness of the exact parameters by which they will be evaluated

Academic information fragmented across multiple institutional platforms

Late and scattered reception of feedback

Ambiguity in the professor's comments regarding how to correct mistakes
